

Saturday Science at **LSU**

October 20th 10:00-11:15 am

We are all Stardust

The origin of elements in
the cauldrons of the cosmos

A public lecture by:

Prof. Catherine Deibel

LSU Department of Physics and Astronomy

Room 130 Nicholson Hall
Louisiana State University

Upcoming Saturday Science Lectures

| | | |
|------------------------|---|---|
| Nov 24 th | Einsten's Legacy: Black holes and gravitational waves | Peter Diener LSU (CCT) Dept. of Physics and Astronomy |
| Dec 15 th | The Mississippi River and Its importance to our Working Coast: Past, Present and Future | Clinton Willon LSU Dept. of Civil and Environmental Engineering |
| Jan 19 th | Development of Asian Monsoon and its impact on the Rise of the Himalaya and the Early Human Civilizations | Peter Cliff LSU Dept. of Geology and Geophysics |
| Feb 16 th | Nano Theater: Research Experiments with Scanning Probe Microscopy | Jayne Garno LSU Dep. of Chemistry |
| March 16 th | Beyond Google: Searching for Music, DNAs and Emails | Rahul Shah LSU Dept. of Computer Science School of Engineering and Computer Science |
| April 20 th | Gulf SERPENT: Partnering with industry to explore life in the deep sea | Mark Benfield LSU Dept. of Oceanography and Coastal Sciences |
| May 11 th | TBA | TBA |
